Raphael Souza Rocha

Mobile & Frontend Development | Performance & Scalability | Product-Driven Engineering

I am a Senior Mobile Engineer specialized in React Native and cross-platform development, focused on building scalable, high-performance mobile products used in real-world scenarios. Over the years, working across different industries and product stages has shaped a pragmatic approach to engineering, grounded in delivery, quality, and long-term maintainability.

My core focus is mobile development, where I design and evolve applications with strong attention to performance, UX consistency, accessibility, and platform-specific nuances. I'm comfortable owning complex mobile features end to end, translating business requirements into clean, testable solutions, and making architectural tradeoffs that balance speed and sustainability.

I collaborate closely with frontend and backend teams to ensure mobile products integrate seamlessly into a high-quality product ecosystem. I value clear communication, ownership, and continuous improvement, and I incorporate AI-assisted tooling as a pragmatic part of modern software development, prioritizing quality, clarity, and engineering sustainability.

EXPERIENCE

Xseed Solutions, Montevideo - Uruguai — Senior *Mobile Software Engineer*

Since Oct 2025

Leading cross-platform mobile development with React Native and Expo, delivering scalable, high-performance user experiences.

Building BFF and backend services with NestJS to support complex product logic, integrations, and AI-driven capabilities.

Shaping architectural decisions with a focus on long-term maintainability while keeping delivery fast and pragmatic.

Using AI-assisted workflows as part of daily engineering practice to improve code quality, reduce friction, and accelerate development.

Medely, California - USA — Senior *Mobile Software Engineer*

Oct 2024 - Oct 2025

Driving modernization of the mobile codebase, ensuring consistent experience across platforms.

Enhancing architecture and core features to improve responsiveness, stability, and development efficiency.

Translating business objectives into scalable, user-focused technical solutions.

SKILLS

Frontend & Mobile: React, React Native, TypeScript, JavaScript (ES6+), HTML5/CSS3, responsive & mobile-first design, accessibility (WCAG), performance optimization, Expo, Next.js, Storybook.

Backend & Databases: Node.js, Nest, Express.js, GraphQL, REST APIs, MongoDB, SQLite.

State Management: Redux, React Query, MobX, Firebase.

Testing & Automation: Jest, Cypress, Maestro.

Version Control & CI/CD: Git, GitHub/GitLab, Azure DevOps, pipelines.

Design & Quality: Figma, SOLID, TDD.

Additional: Cloud (AWS, Azure), analytics & monitoring (Firebase, Statsig, Sentry, Rollbar).

LANGUAGES

Portuguese - Native
English - Fluent
Castilian Spanish - Advanced

Simplifying maintenance processes, reducing bugs, and extending component lifecycle.

Promoting a collaborative engineering culture through reviews, mentorship, and knowledge sharing.

VisualBoston, Massachusetts - USA — Senior React Native Engineer

March 2024 - Oct 2024

Led integration of a major update to the O2X – Tactical Performance app, improving layout, data handling, and user experience.

Oversaw deployment of new features, applying performance optimization techniques.

Provided consultancy on performance analysis and mobile development best practices.

Coordinated with distributed teams across the US and Brazil to ensure smooth delivery.

Fluxo, Belém - Brazil — Lead Mobile Engineer

April 2024 - Oct 2024

Led mobile development for a fintech project targeting the Amazon region.

Implemented security best practices and conducted thorough code reviews.

Designed infrastructure plans to ensure scalability and reliability.

Collaborated with UX/UI and business stakeholders to align development with goals.

Vix, Espírito Santo - Brazil — Mobile Engineering Lead

July 2022 - Oct 2024

Led development of new features and improvements for the Vapt-Jornada React Native app, serving over 18,000 active users.

Pontual: Built two Uber-style apps for bus company staff and clients, with real-time tracking using Google Maps API.

Vapt-Analytics: Delivered a BI-focused management app in one week, enabling data queries and KPI tracking.

Vapt-Journey: Kotlin offline-capable clock-in/out app for low-connectivity environments.

AWARDS

1st Place – Hackathon Insern 2021: Developed a prototype with navigable layout, pitch, and business plan, evaluated by experts from public and private sectors in IT and security.

Top 5 – Amazon Launch 2017: Recognized as one of the five most innovative technology startups in the Amazon region.

CERTIFICATIONS

Rocketseat - Bootcamp GoStack 14 - 2021

McAfee - Endpoint Threat Protection Defense - 2019

Trend Micro - Deep Discovery Advanced Threat Detection 3.3 Certified Professional - 2021

Trend Micro - Apex One Certified Professional - 2021

Trend Micro - Deep Security 20 Certified Professional - 2021

VOLUNTEER WORK

Speaker at over 27 events in schools, presenting technology careers and demonstrating home-built 3D printers (2016–2017).

Guest speaker for CESUPA medical and physiotherapy faculty workshops on technology and innovation in healthcare (2017).

Wine.com.br, Espírito Santo - Brazil — *Front end Software Engineer*

Oct 2021 - Jun 2022

Contributed to the largest wine e-commerce platform in Latin America, enhancing key features and integrating SDKs/APIs to boost performance and user engagement.

Delivered new functionality for the Mexico App, expanding reach to an international customer base.

Led the development of a high-impact seasonal sales campaign page, optimizing it for scalability and high conversion during peak traffic periods.

Tech stack included React Native, Firebase, Redux, GraphQL, Node.js, and Next.js.

SEPLAD, Belém - Brazil — *Web & Mobile Developer*

Oct 2020 - Oct 2021

Built and maintained government web and mobile apps using HTML, JS, CSS, Bootstrap, and React Native.

Prodepa, Belém - Brazil — *Front-end Developer*

March 2020 - Sep 2020

Developed front-end interfaces using React and Vue.

Casa Civil do Governo do Estado do Pará, Belém - Brazil — *System Analyst*

March 2019 - March 2020

Managed network infrastructure and improved internal systems using Expo, React, Node.js, and React Native.

LAB3D, Belém - Brazil — *Project Development Manager - Founder*

Jan 2016 - Jul 2019

Founded and managed the first 3D printer training/manufacturing startup in northern Brazil.

Led innovation projects, programming in C and C++ to enhance hardware performance.

Directed business operations, team leadership, and product development.

COURSES

AWS Certified Solutions Architect - SAA-CO2

Microsoft Azure Administrator - AZ-104

Trend Micro - CPITS3 - Brazil

PROJECTS

My non-commercial projects are available on GitHub at **github.com/RaphaelSR**. Feel free to explore and contribute to them.

Defensoria Pública do Estado do Pará, Belém - Brazil — *Trainee*

Jan 2016 - Jan 2017

Supported network traffic control, server maintenance, and planning future network infrastructure.

Fab Software, Belém - Brazil — *Trainee*

Feb 2015 - Dec 2015

Contributed to projects using Ruby on Rails, Java, and C# for companies in the Amazon region through CESUPA partnerships.

CTIC Cesupa, Belém - Brazil — *Trainee*

Aug 2014 - Jan 2015

Managed stock control systems and developed internal software in Java.

EDUCATION

Bachelor's degree, Computer Science — Cesupa, Belém

Jan 2014 - Jan 2018

IT *Security certification* — Trend Micro, São Paulo

Feb 2021 - March 2021
